# SMART CARD READERS

## FOR USE WITH COMMON ACCESS CARDS (CAC) AND OTHER SMART CARDS
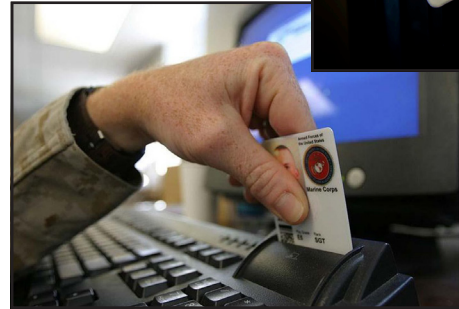

**GENERAL DIGITAL**
*Engineering What's Next*

A Common Access Card (CAC) is one type of "smart" card, and the type most often used by our customers. About the size of a credit card, it is the standard form of identification for active duty uniformed service personnel, Selected Reserve, DoD (Department of Defense) civilian employees, and eligible contractor personnel. It is also the principle card used to enable physical access to buildings and controlled spaces.

Many security-sensitive computer networks and applications need smart card readers for access control and authentication.

Have General Digital integrate a smart card reader into one of our many standard or custom monitor or keyboard products for your application. Call today to discuss your requirements with a Sales Engineer to find the perfect match.

» **Smart cards can be used in nearly any field, including medical, transportation, industrial, education, technology, aerospace**

» **By providing improved security and better data, smart cards reduce costs for governments and regional authorities**

» **Most smart card readers can be integrated into our rugged products, including our most popular models:**
   › **SlimLine 1U**
   › **SlimLine Lite II**
   › **TwoView (all models)**
   › **Standalone, Panel Mount and Rack Mount Monitors (all models of Barracuda, Saber and Titan)**
   › **Desktop and Rack Mount Keyboards**

# SMART CARD READERS

CAC READERS BUILT INTO GENERAL DIGITAL MONITORS & KEYBOARDS

Engineering What's Next

**INTEGRATED SMART CARD READERS**

## SlimLine Lite II: Rack Mount Flip-up Monitor with Integral Keyboard & Trackball with CAC Reader

This rugged SlimLine Lite II features an integral CAC smart card reader in the base of the unit in front of the keyboard. It is easily accessed by simply flipping up the display. Also, we can integrate a 4-port USB hub that allows for a single cable to connect the keyboard, mouse and CAC reader to the system.

## SlimLine 1U: Rack Mount Flip-up Monitor with Integral Keyboard & Trackball with CAC Reader

Though the SlimLine 1U is only 1.75" high, we were able to squeeze a CAC smart card reader into the keyboard. Its location on the front of the unit provides maximum convenience for accessibility. It also features an integrated 4-port USB hub that allows for a single cable to connect the keyboard, mouse and CAC reader to the system.

## K82-12TBB-MIL-CAC: Desktop Keyboard with Integral CAC Reader

General Digital offers rugged, military-grade keyboards with optional CAC smart card readers. Additionally, we can design a custom enclosure, whether desktop or rack mount keyboard, with an unobtrusive slot for the smart card. Also, we can integrate a 4-port USB hub that allows for a single cable to connect the keyboard, mouse and CAC reader to the system.
